Job Opportunity: Refrigeration Engineer

R&S Building Services Engineers

are looking to recruit an experienced Refrigeration Engineer to join their team of engineers who install and maintain HVAC and Chiller Units on commercial/industrial sites.

The role is a key position within both the Installation and Maintenance Sections of the Company. Working Monday – Friday it is predominantly site based carrying out Installation, servicing, maintenance, breakdown, and commissioning activities on a diverse set of equipment ranging from small D-X split systems to Multi VRF/VRV System and large commercial chilled water plant.

The successful candidate will be supplied with their own vehicle plus the specialist tools and equipment to carry out their job.

Qualifications

The role requires a significant level of job knowledge, training and technical knowhow particularly when carrying out fault diagnostics. The person undertaking this role must have the following qualifications;

- Level 2 NVQ MES Small Commercial Ref. & Air Cond. Systems or
- Level 3 NVQ or equivalent in Refrigeration
- Registration under FGas Regulation
